EXPERIENCE

2026: I have undertaken observational placements with two dental clinics in London to enhance my communication skills with UK patients. This experience has provided me exposure to a variety of dental programmes and techniques, including Exact,and among others.

General Dentist, Douvin Medical Center, Riyadh, KSA- 12/2020 - 12/2022

- Improved patient safety by delivering careful screening of teeth and soft tissues.
- Raised diagnostic accuracy by using imaging technology to shape precise treatment plans.
- Enhanced oral function through extractions, restorative care, and prosthodontic solutions.
- Boosted patient confidence by completing cosmetic work, including veneers and whitening.
- Reduced infection risks by maintaining strict protocols across the clinical environment.
- Supported continuity of care by keeping confidential patient records
- Strengthened care outcomes by coordinating closely with staff on quality standards.
- Provided emergency dental care on short notice, mitigating severe discomfort or complications.
- Assessed and treated gum diseases promptly, preventing further deterioration or loss of teeth.
- Installed crowns and bridges skillfully, restored damaged teeth effectively.

General Dentist, Muhaidab Dental Center, Riyadh,KSA- 11/2019 - 12/2020

- Delivered root canal treatments to address pain and restore oral comfort.
- Directed corrective surgery for impacted or misaligned teeth to improve function.
- Managed clear patient discussions on treatment plans and aftercare requirements.

• Oversaw prosthodontics planning, including dentures and multiple prosthesis types.

• Coordinated paediatric treatment for early childhood caries with pulpotomies and pulpectomies.
